

TENGOINTERNET

THE ONE CHOICE FOR HASSLE-FREE WIFI

As a multi-property manager, you have a lot of plates already in the air. So how can you make sure all your properties' WiFi stays reliable and up-to-date? TengoInternet is the best solution for managing and monetizing all of your WiFi networks. As your **ONE** provider, **ONE** point of contact, and **ONE** bill for all WiFi and ISP needs, we're the **ONE** smart choice.

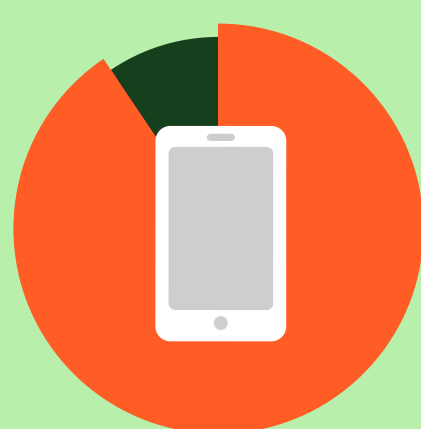

THE DEMAND FOR WIFI

WIFI HAS BECOME THE MODERN TRAVELERS' MOST REQUESTED FEATURE.

80%

of leisure travelers cite WiFi as the most important amenity while

94%

of travelers take at least one mobile device on trips.

A VARIETY OF NEEDS

DIFFERENT GUESTS HAVE DIFFERENT NEEDS. A PROPERTY'S WIFI SOLUTION MUST HANDLE DIFFERENT TYPES OF USAGE:

- Streaming movies and video services like Hulu and Netflix.
- Using multiple devices around any part of the property and using mobile devices with weaker WiFi antennas.
- One login across multiple properties.

AND IT NEEDS TO DO SO WHILE REMAINING AFFORDABLE TO YOU TO MANAGE AND UPKEEP.

Configuring such a network used to mean relying on different providers and service technicians. And if you are managing more than one property, it gets even more confusing.
